

Online Reading/Viewing Lesson 5 - The Lorax

Rainbow thinking cap.

- When we read or listen to a text we make connections by making up our ideas based around the content of the text.
- This video reminds me ... of when I first saw a fidget spinner in my class. It looked like fun and I really wanted one. But after a while I found that it really served no purpose. And look around no one uses them anymore?

["Everybody Needs A Thneed" - video](#)

YOU are going to think of a pretty useless (superfluous) product that you could invent, create and sell.

Use these suggestions from the "Rainbow Thinking Cap."

Remember you can be as crazy as you want;

- A shoe that will fit both feet.
- A grass coloured soccer ball.

I'm sure that you and your family can think of better ones.
Now you're going to advertise your product.

- Choose your favourite idea and draw a sketch, label the sketch with some of the main features of your useless invention.

Look at this poster;

- Create a poster of your own useless invention.
- If you can, take a photo of your poster for your teacher.
- 🙄 Now ask yourself if you feel like you've made a connection to the Once-ler or to The Lorax story??
